## Automatic Chocolate Tempering Machine

We temper our chocolates to make the most beautiful chocolates in this automatic chocolate tempering machine. This machine features multiple control methods and temperature settings to accurately temper multiple batches of chocolates within less time.

## Dry Heat Chocolate Melters

We use highly efficient tabletop heating container for the melting our batches of chocolates. In this machine, the temperature is controlled by an induction heating device, giving just perfectly melted chocolate.

It features adjustable mechanical thermostat to ensure seamless induction heating.

## Microwave

We use microwave for baking purposes. Its high quality ensures desired baking results which we expect in our delicacies.

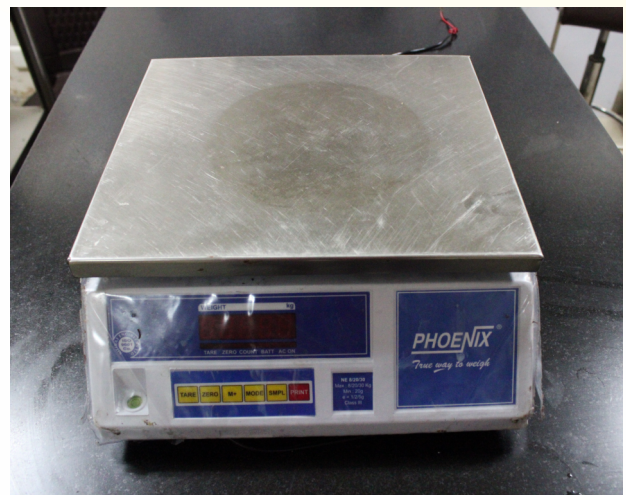

## Induction Cooktop

For the effortless and programmed cooking involved in our several baking or chocolate-making processes, we use this induction cooktop that is digitally operated and quite efficient.

## Electrical Weighing Machine

For accurate measurement of our ingredients, we use this electronic weighing machine that has stainless steel platform and sturdy design.

## Commercial 4-Door Refrigerator

This four door refrigerator is used to set chocolates and cake icings at the right temperature. It features split door design for rapid recovery and energy saving.

## Planetary Mixer

Our chefs use this multi-purpose equipment for cream whipping and mixing. It has durable steel planetary gears and control panel specifically designed to limit the traverse motion and other elements.

## Shrink Wrapping Machine

We use L-Sealer Shrink Wrapping Machine to create poly bags of heat sensitive shrink film around our products. The attached Shrink Tunnel then applies heat to the bags for shrinking.

## OTG Oven

Our baking professionals use this Oven Toaster Griller to warm or bake our delightful desserts to the perfection. It features multi-functional knobs to control the overall process.

## Two Deck Oven

This fast and versatile deck oven is an important addition to our equipment arsenal. This 2-deck oven has helped us expanding our menu and improve our food quality. It is versatile enough to cook, bake different items on our menu.

## Convection Oven

With super fast cooking speed, convection oven settings, convection oven helps our chefs to cook the most lip-smacking items on our menu.

We use it to make our cakes, pastries, quick breads, cookies, pies and more.

## Deep Freezer

We use this highly sophisticated deep freezing machine to freeze our most precious ingredients and raw frozen food items.

This deep freezer focuses on maintaining low temperatures that help us keep the products at extremely low temperatures to only extent shelf life.

## Lid Sealing Machine

After filling the product in the container, we use this lid sealing machine to precisely seal their lids. The lid will be perfectly sealed and then the product will be sent to the customers hygienically and with perfection.

## Continuous Sealing Machine

We have Continuous Band Sealer which is suitable for sealing Pouch packages & sealing plastic films made from various materials continuously.
